

Rail-Line's on-line web booking tool offers large scale corporate rail users an outstanding combination of cost savings, traveller flexibility and management control

WHAT OUR CUSTOMERS SAY...

“...very quick system for planning traveller schedules and obtaining pricing options all on one page.”

“...this is a fantastic system; information is easy to find and data for each booking is automatically downloaded into a spreadsheet and split by cost centre.”

Bevan Brittan LLP
Leading national law firm

WHAT WE SAY...

“Our on-line tool is delivering substantial cost savings and improved services to many of our clients across the UK - everyday of the week.”

Debbie White
Director, Rail-Line.co.uk

Faster, smarter, greener... trains are back in fashion. With carbon emissions high on the political agenda and dramatically improved services on the rail network, rail travel offers employers and today's business traveller, a highly attractive alternative to UK air and road travel.

- Fast city-to-city travel, often in less time than it takes to get to the airport
- Business as usual with laptop power points and with internet connection
- Pre-assigned and comfortable seating with table and 'at-seat' service
- Request 'quiet compartment' for peace and quiet
- A greener travel solution and savings of up to 44% vs. air and road travel
- Employee travel monitoring system to meet Corporate Social responsibility requirements.

Key benefits of the Rail-Line booking tool

- No booking fee
- No more queuing - print tickets in your office, or guaranteed next day delivery
- Simple to use; check, plan, price, book and issue rail tickets in real time
- Automatically ensure travellers comply with corporate travel and expenditure policies
- In case of crisis, track employee whereabouts in seconds
- Professional on-line management information tool
- Consolidated weekly or monthly electronic invoicing
- Dedicated support includes in-house training and support from specialist rail travel consultants in the UK.

The professional on-line booking tool for large scale corporate UK rail users

*...lower travel costs, better service **and** you're in control*

How the Rail-Line self-booking tool works

- Check, plan, price, book, issue tickets and manage your company rail travel in real time on line; all at the click of a button.
- Whether you are booking a second or first class ticket, by identifying the best available travel options and fares on line, this tool delivers substantial cost savings vs traditional methods of booking rail travel.
- By issuing tickets locally at your offices, queuing at the station ticket office becomes a thing of the past. Tickets issued by the system are accepted for use at rail station barriers which ensures the traveller time spent at the station is kept to a minimum.
- Management time is also kept to an absolute minimum as our booking tool captures all travel and expenditure data and delivers it to you in a format which is entirely flexible and in line with the reporting requirements of your company.
- The online service is secure and depending on the number of offices to be enabled, system set-up and in-house training by Rail-Line's dedicated team of rail travel specialists, takes just a few short hours.
